The same SigPlus you've relied on for forensic electronic signature capture with Topaz signature pads is now available for Tablet PC's. SigPlus for Tablet PC requires no external hardware devices, and uses the pen that comes with the tablet PC to capture signatures directly on the Tablet PC screen. For a nominal fee Topaz Systems licenses SigPlus Tablet PC ActiveX, which allows you to use all of our user-friendly applications and plug-ins on your Tablet PC. Essentially your tablet PC acts as your computer and your signature device hardware.

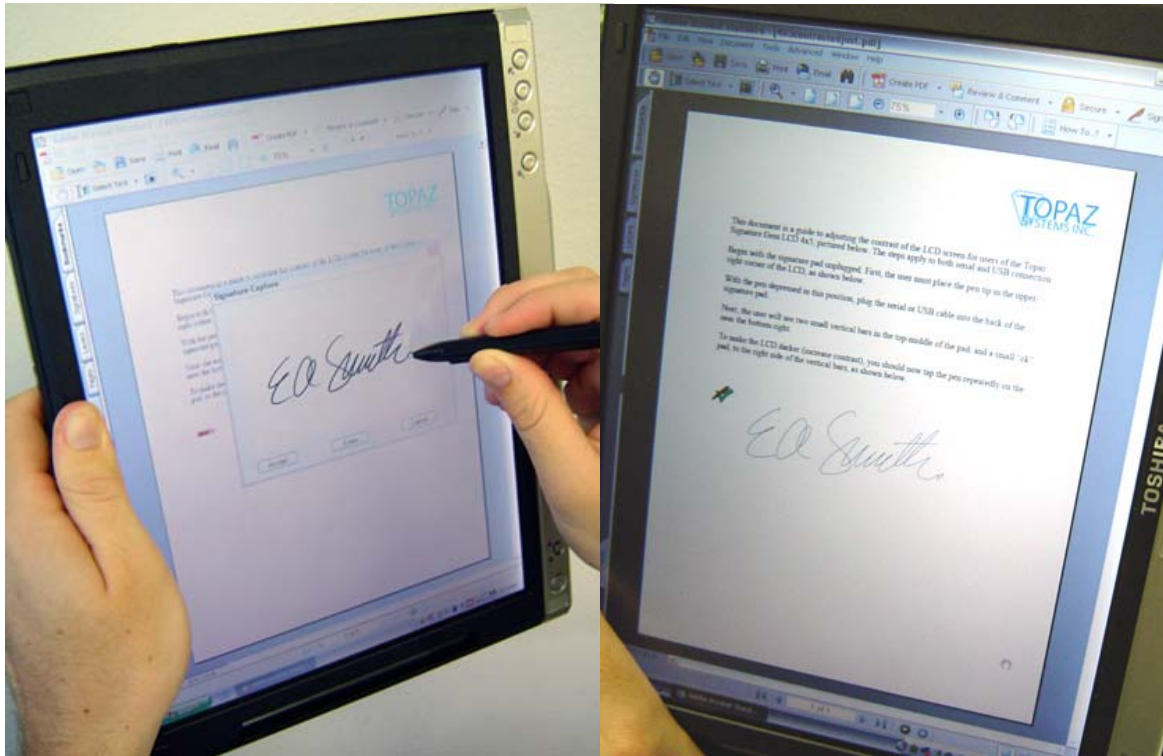

SigPlus ActiveX is compatible with many development environments and languages (C++, .NET, VB6, Delphi, Access, Powerbuilder, Lotus Notes, Web Applications, and anywhere else an ActiveX can be used for development).

Below are shown a few common examples of our plug-ins and programs being used on a Tablet PC.

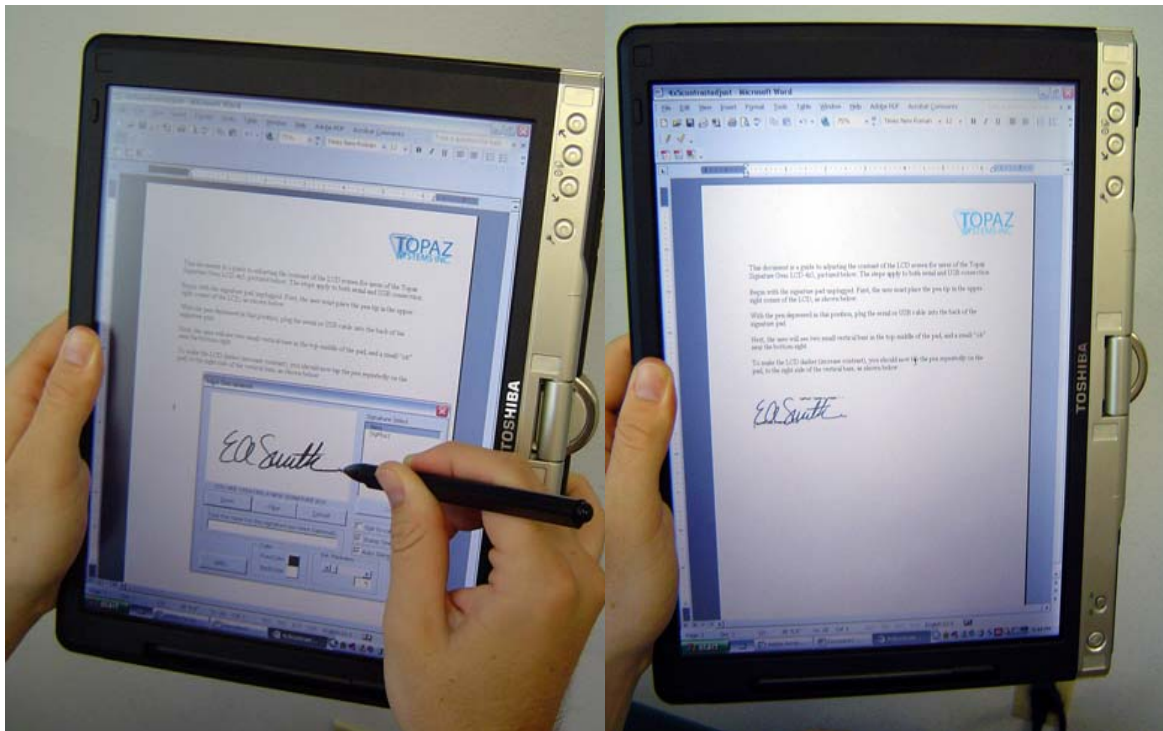

Topaz's Demo OCX

Adobe Acrobat using GemSign Plus

Microsoft Word using Topaz Microsoft Office Plug-in

Internet Explorer using SigPlus Demo

The above examples are only a few of the many applications you can place a signature in using Topaz SigPlus for Tablet PC's. If you want to become licensed to use this powerful signature capture software please contact Topaz Systems at (805) 520-8282.
