

Capture the Benefits of ESIGNATURES™

Electronic signature capture devices
and software for every application

Electronic Signature Solutions For
Wherever Business Takes You.®

Solutions For Every Signature Application

With over thirty different pad models to choose from, Topaz Systems brings the right product to your application environment. Signature pad products feature interactive LCD pads, full-color VGA displays, integrated fingerprint sensors, Bluetooth and wireless capabilities, full-size inking clipboards, attached magstripe readers, units for kiosk environments, high resolution tablet displays, and many more to fit your eSignature application needs.

Specialty signature units with all the high-quality biometric and forensic capture techniques of a Topaz signature pad (Shown above: SignatureGem® LCD 4x3 with MSR and ID LCD 1x5 tablet).

Citrix, Terminal Server, & VDI Environment Signature Options

Need your signature applications to run in a Terminal Server, Citrix, or VDI environment? Topaz® has multiple options for adding signature capture to remote environments. With the recommended option of BSB® signature models, pads work seamlessly with Terminal Server, Citrix, or VDI environments through a Virtual Serial Via USB interface (see the following page for more information on Remote Usage Options).

Interactive LCDs for displaying text, graphics, and checkboxes (Shown above: GemView® 10 Tablet Display and SigLite® Color 4.3).

Signature Software Solutions Bundled at No Extra Charge

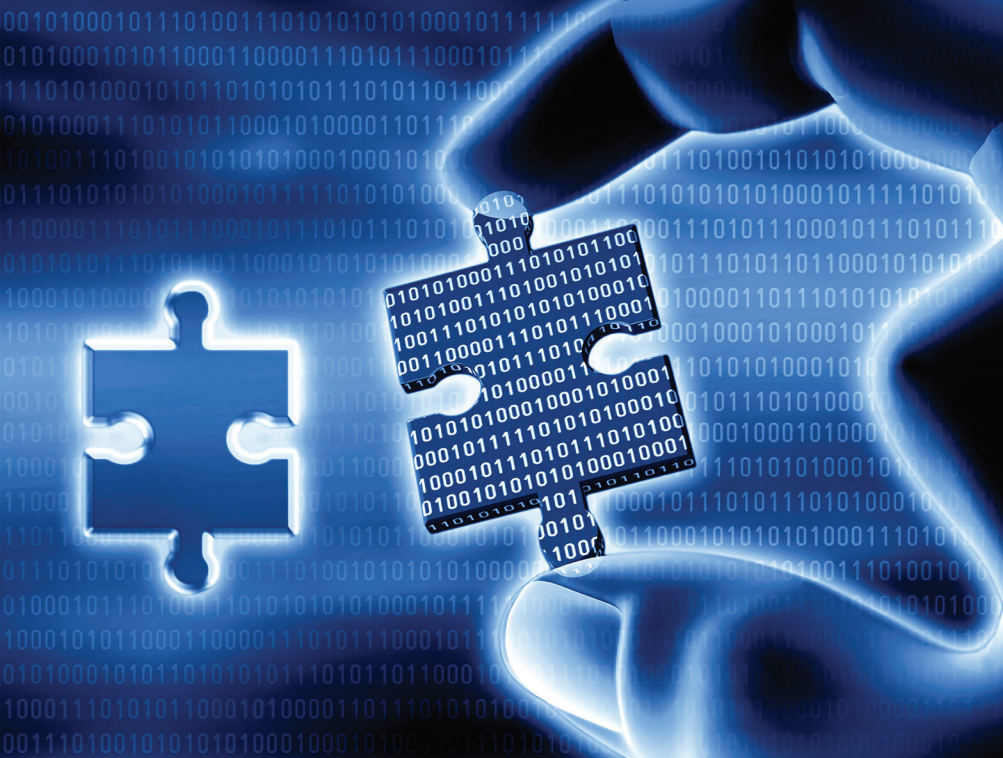

Purchase a Topaz signature pad and receive SigPlus® software tools, applications, and plug-ins at no extra charge for a complete, integrated signature solution. All support and updates are free, making it simple to keep your eSignature system up and running.

Simultaneous ink-on-paper signature capture to meet every signature application need (Shown above: ClipGem® and SigLite 1x5).

Topaz Signatures Upheld in Federal Court

Aside from the cost and compatibility benefits of Topaz signature pads and SigPlus software, Topaz signature solutions capture the highest-quality and most forensically-robust electronic signatures and bind them to electronic documents. Our patented integrity and security checks can detect and prevent fraud before it happens. Topaz Systems' signature tools provide eSignature capability that exceeds the state, national, and global eSignature laws.

Bundled Software

Analyze and Authenticate Signatures

Want to verify or forensically-authenticate electronic signatures? With the Topaz verification software, users can visually compare and verify electronic signatures without the need to create or store templates, giving our customers the peace of mind that comes from knowing their eTransactions are enforceable in a court of law.

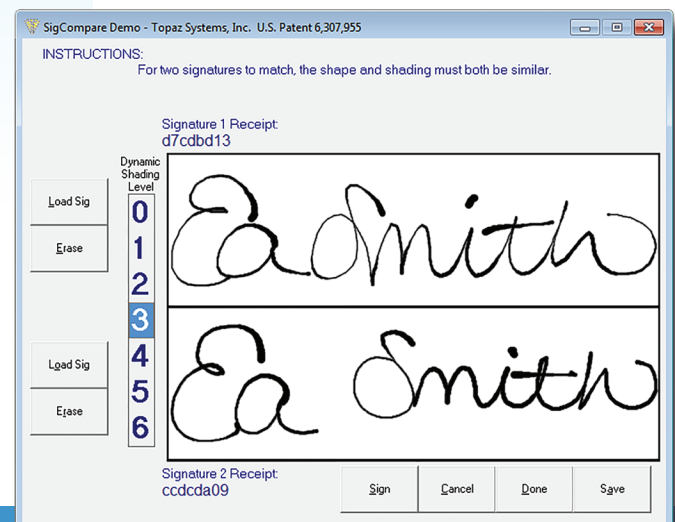

Why buy separate third-party software applications and plug-ins when Topaz® provides all the signature software tools, support, and updates you will ever need free of charge?

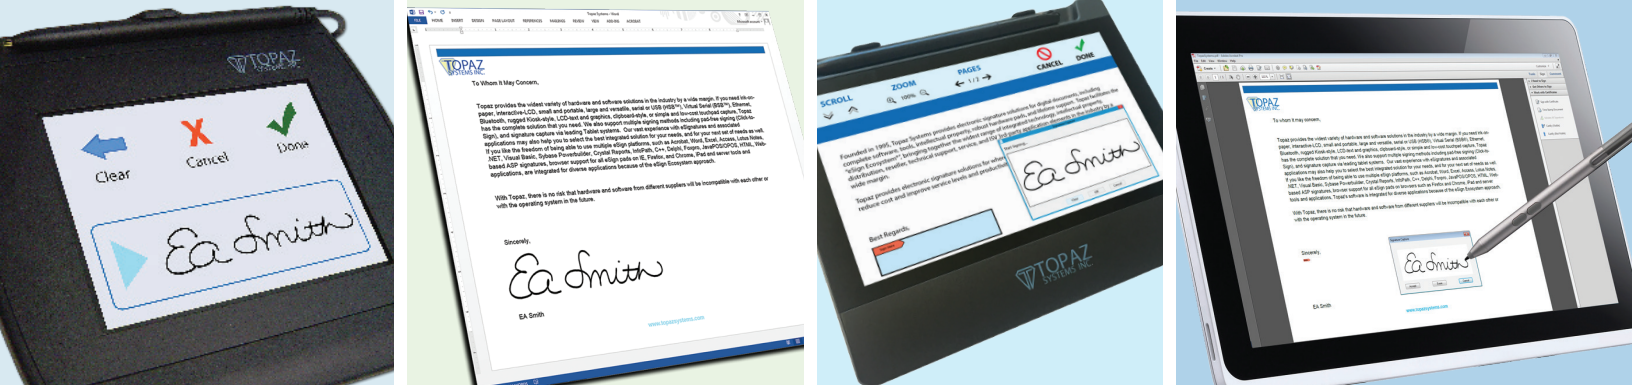

Custom Development Tools

Whether you want to run your Topaz signature pad out-of-the-box with SigPlus® software downloads or develop your own application with the SigPlus Pro™ development tools, our eSign Ecosystem® will bring you a complete signature solution. Software downloads come with source code examples, demos, and support to help create applications for the desktop, server, and even a Windows Tablet or Apple iPad.

Plug-Ins and Applications

In addition to the Topaz SigPlus Pro development tools, we offer several utilities and plug-ins to enhance your eSignature capabilities. With the Topaz pDoc Signer® PDF application, create, design, and sign PDFs with a simple click of the toolbar. Users can also easily sign common third-party documents in Word, Excel, and PDF documents with our Microsoft Office and Adobe Acrobat plug-ins.

Capture the benefits of eSignatures with THE ESIGN ECOSYSTEM[®]

Signature Solutions and Software For Every Application

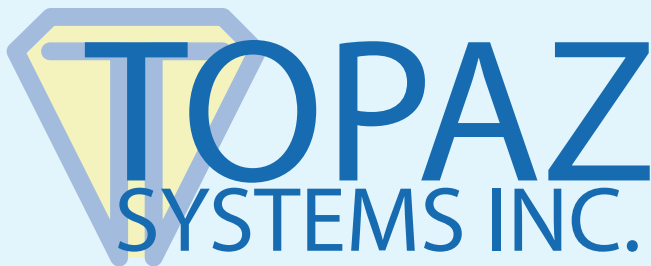

Topaz[®] brings together the widest range of integrated technology, intellectual property, distribution, reseller, technical support, service, and ISV third-party application elements in the industry by a wide margin. Customers thereby gain the benefits of network effects, making your products, software, and services easier to deploy, update, and support, and more successful and profitable overall. We call this the eSign Ecosystem.

Bundled SigPlus Software Tools

Within the eSign Ecosystem, Topaz provides all the software tools, updates, and support you will ever need. A license to use our powerful eSignature software tools, applications, utilities, and plug-ins is included with the purchase of a tablet at no additional charge, making Topaz a great eSignature value. With Topaz, you will never need to buy separate development tools, third-party application plug-ins, and verification utilities to keep your eSignature solutions up and running.

Extensive eSign Patent Portfolio

Topaz electronic signature pads provide high-quality signature capture solutions for every signature application with over ten patents covering eSign hardware and software. View the complete list at www.topazsystems.com/legal.
