*cryptographic binding, compression, and authentication for eCommerce*

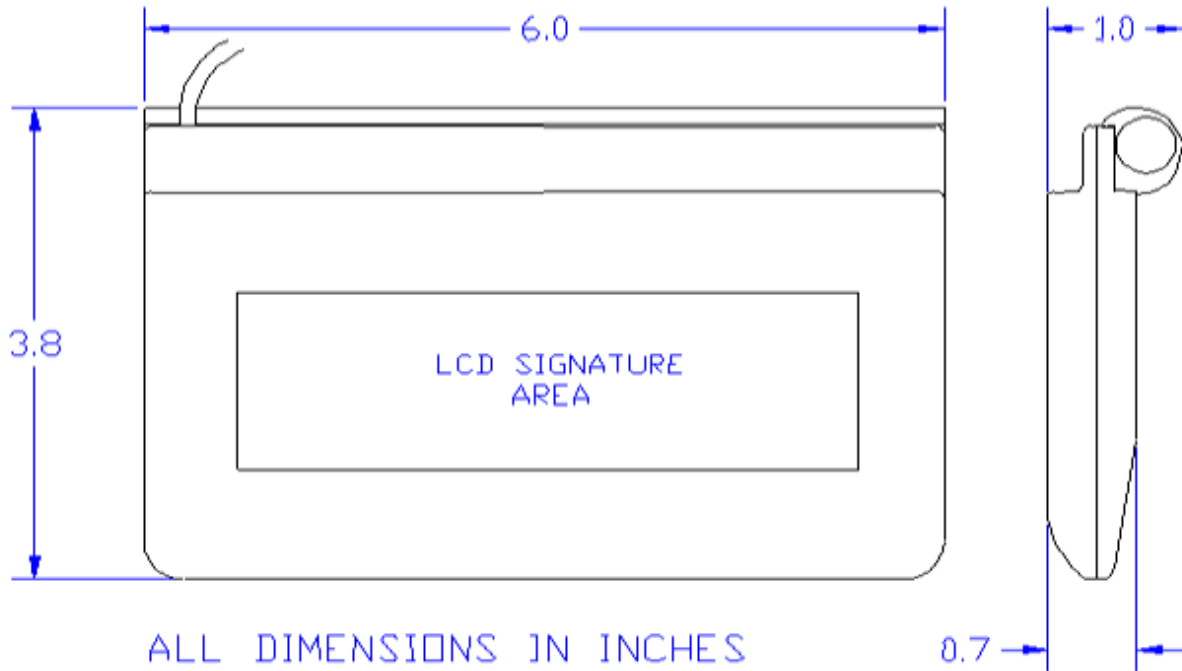

## Applications

- Bank/Credit Union signature enrollment and verification
- HIPAA applications, medical and hospital sign-in and consent
- Insurance enrollment, worksite marketing

## Description

The Topaz SigLite series of electronic signature capture tablets are designed to provide the benefits of electronic signatures in a controlled environment where cost is a significant issue. The SigLite LCD is an LCD version of the simplified no-frills SigLite pad that retains the high resolution, accuracy, and data rate of the SignatureGem series of tablets but with a lower-cost touchpad interface. The LCD display shows “electronic ink” under the pen tip as the user signs and can be used to display interactive text and graphics where users can read agreements and check preferred options. SigLite LCD boasts the additional value of Topaz’s powerful bundled software tools and support, including ActiveX, Java, Wintab drivers, and MS Office and Adobe Acrobat plugins for the capture, cryptographic binding, formatting, and secure processing of signatures. Topaz SigPlus software is compliant with eSign, state and federal digital signature regulations by virtue of its ability to bind the signature to a document or electronic form data. Examples and software plug-ins are bundled with the tablet.

## Mechanical Outline

## Ordering Information

### Model T-L460-B

*SigLite LCD signature capture tablet with interactive RS-232 DB9 serial interface*

### Model T-L460-HSB

*SigLite LCD signature capture tablet with HID interactive USB interface*
